DETAILED ACTION

1. This communication is responsive to the amendment filed 1/2/2004.

Claim Objections

2. Claims 12 and are objected to because of the following informalities:

Claim 12 is directed to a system, which fails to further narrows the limitation of a previous claim, claim 1.

Claim 14, under line 2: claim 13

Appropriate correction is required.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) The invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.
- 3. Claims 1 and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Azizi (U. S. Pat. 6,628,788).

Regarding claims 1 and 12, Azizi discloses a system for implementing the method per claim 1, characterized in that a processing unit (9) is provided which receives an input signal (from 13) and which permits within the processing unit the determination of a threshold value for the purpose of limiting the output signal (to 12), said threshold value being adjustable as a function of the level of the input signal as claimed.

Application/Control Number: 09/924,753

Art Unit: 2643

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

- (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 4. Claims 2-11 and 13-20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Azizi (U. S. Pat. 6,628,788).

Regarding claims 2-4, 9-10 and 13-15, Azizi does not a specific averaging function for the processing as claimed. Since providing a suitable existing processing algorithm for calculating the averaging signal is well known in the art, it therefore would have been obvious to one of ordinary skill in the art at time of the invention was made to be motivated to select a desirable well-known processing algorithm for the processing, such as an averaging signal function for the processing, in order to obtain desirable acoustic effects.

Regarding claims 5-8, 11 and 16-20, Azizi does not clearly show a threshold value as claimed. Since providing a bandpass filter having a set threshold values for filtering acoustic signal is well known in the art, it therefore would have been obvious to one of ordinary skill in the art at time of the invention was made to be motivated to provide a suitable filter/filterbank with desirable characteristics, such as pass band or limit band for the filter of the processing circuitry, in order to obtain desirable acoustic effects, such as noise reduction.

Response to Amendment

5. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to **Suhan Ni** whose telephone number is (703)-308-9322, and the number for fax machine is (703)-305-9508. The examiner can normally be reached on Monday through Thursday from 9:00 am to 7:30 pm. If it is necessary, the examiner's supervisor, **Curtis Kuntz**, can be reached at (703) 305-4708.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the group receptionist whose telephone number is (703) 305-3900.
